To Whom It May Concern,

The Westin Edmonton would like to recognize Sierra Lane Construction. Our engineering department has been working with Benson Chiu and his team for almost two years and their work in our property has been desirable. They always respond to our emergency calls for things that require immediate repair.

Sierra Lane Construction has been a huge asset to larger projects like our recent hallway chair rail installation. They were very understanding and patient regarding our schedule of which floors to work on. Work like this is heavily dependent on guest traffic and has the tendency to change frequently.

Thank you, Benson Chiu and your team at Sierra Lane Construction. We look forward to our continued work together.

Be Well.
